ES-E SERIES

photovoltaic panels

210, 215, 220 & 225 W

CERTIFIED FOR COASTAL INSTALLATIONS

MORE electricity

Our ES-E series panels have one of the best power tolerances in the industry (-0/+5 W) and consistently deliver more electricity than competitors in field tests.

LESS impact

Evergreen Solar String Ribbon® panels have the smallest carbon footprint and fastest energy payback of any silicon-based solar panel ever made.

POSITIVE POWER TOLERANCE O The rated power is the minimum so you never get less power than you pay for. SMALLEST CARBON FOOTPRINT⁴ Our String Ribbon® wafers are made with INDEPENDENTLY VERIFIED POWER² O a fraction of the emissions that result from Four independent test labs regularly check panel making conventional silicon panels. power to make sure you get the power we promise. 12-MONTH ENERGY PAYBACK⁴ **ANTI-REFLECTIVE GLASS** Delivering 2-3% more electricity compared Our panels begin generating truly clean to panels with standard glass. electricity faster than any other silicon-based panel on the market. **TEMPERATURE RATINGS OVER 90%**³ ○ Maintaining up to 4% higher output than most other 100% CARDBOARD-FREE crystalline silicon panels under hot conditions. **REUSABLE PACKAGING** Reduces disposal costs and on-site manpower while eliminating tons of landfill. MICRO-INVERTER COMPATIBLE O Panel voltage compatible with state-of-the-art micro-inverters used to improve performance of residential systems.

1 Guaranteed upon initial delivery of the panel to the customer; maximum power up to 4.99 W above nameplate rating; 2 Power regularly calibrated by taking the straight average of test data from NREL, TÜV Rheinland PTL, TÜV Rheinland Cologne and Fraunhofer ISE; 3 Based on comparing PTC/STC ratings of major competing multi-crystalline silicon brands

4 Evaluation completed by the Energy Research Foundation of the Netherlands (ECN), May 2009

STRING RIBBON® SOLAR PANELS OFFERING EXCEPTIONAL PERFORMANCE AND INDUSTRY-LEADING ENVIRONMENTAL CREDENTIALS. IN SHORT, MORE ELECTRICITY AND LESS IMPACT.

Weight	42.9 lbs.
Solar Cells ⁶	120 Multi-Crystalline Silicon String Ribbon®
Frame	Black Anodized Aluminium—Doubled Walled
Front Cover	Anti-Reflective Tempered Solar Glass 1/8" Thickness
Encapsulant / Back Cover	EVA / White TPE
Maximum Certified Snow Load ⁷	80 lbs./ft²
Maximum Combined Wind & Snow Load ⁸	80 lbs./ft²
Hailstone Impact Test ⁹	ø 1"(25 mm) ice ball at 52 miles/h (83 km/h)

The above drawing is a graphical representation of the product; for engineering quality drawings please contact Evergreen Solar. MC® is a registered trademark of Multi-Contact AG. Product constructed with 120 poly-crystalline silicon String Ribbon® solar cells, anti-reflective tempered solar glass, EVA encapsulant, polymer back-skin and a black anodized double-walled aluminum frame. Product packaged 28 per pallet and tested to International Safe Transit Association (ISTA) Standard 2B. All specifications in this product information sheet conform to EN 50380. See the Evergreen Solar Safety, Installation and Operation Manual, Mounting Guide and Inverter Selection Guide for further information on approved installation and use of this product.
