Greener than Green

DesignBlack

The DesignBlack series meets the highest aesthetic standards. The module, with dark polycrystalline cells, a black back sheet and black frame, turns any plant into an eye-catcher due to the homo-geneous surface.

Durability

The high quality modules of ITS are manufactured exclusively in Sweden and pass through strict inspections during production. ITS's module factory has many years of manufacturing experience. Performance and long-term tests are conducted by independent institutes and excellent results are achieved.

Performance

Benefit from even more module power with our positive sorting in 10 Wp-steps, meaning you pay for the 250 Wp-class, but get modules that are flashed between 250 Wp und 259.9 Wp. Because of the special anti-reflection glass, ITS modules achieve an even higher yield.

Sustainability

In each of our production steps we follow our "greener than green" philosophy! ITS factories are subject to strict environmental regulations and rely on renewable energy sources.

Our distribution centers are strategically located to serve the emerging and most demanding markets, thereby reducing transportation distances which decreases our environmental impact.

Highlights

- European module production in Sweden
- PID test passed at Fraunhofer CSP
- Superb design
- Elegant black back sheet
- Higher yield because of anti-reflection glass
- A very homogenous cell image

The Certification Mark for Clean Sustainable Energy Technologies

* STC – Standard Test Conditions, measurement conditions: intensity irradiation 1000 W/m², spectral distribution AM 1.5, temperature 25 ± 2°C, according to standard EN 60904-3

** NOCT – Normal Operation Cell Temperature, measurement conditions: irradiation intensity 800 W/m², AM 1.5, temperature 20°C, wind speed 1 m/s.

*** Reduced efficiency with the decrease in the intensity of irradiation of 1000 W/m² and 200 W/m², temperature 25°C according EN 60904-1

**** Reverse current power rating: operation of the modules with an external power source is only permitted with a string fuse with a release current of < 2 x Isc @ STC*

Measuring tolerances of Pmax @ STC ± 3%, of reference module ± 2%, all other electric parameters ± 10%

This datasheet conforms to EN 50380. Innotech Solar reserves the right to change specifications without notice.
