

SeamlessGrid™

A new generation of HYBRID TECHNOLOGY

The Integrated Power Control System by UGE.

SeamlessGrid™ is the first comprehensive power control system that manages your energy needs holistically.

A breakthrough for distributed renewable energy, SeamlessGrid™ includes all components necessary to manage a UGE hybrid wind/solar system, complete with remote monitoring from **viewUGE™**.

For sites looking for greater sustainability and energy independence, along with lower costs, SeamlessGrid™ weaves together wind, solar, and the grid to provide a truly *seamless* installation.

Our goal? To provide renewable energy to all, all year long.

Visit www.urbangreenenergy.com/seamlessgrid to learn more.

SeamlessGrid™

SeamlessGrid™ consists of five core components:

- Hybrid Inverter
- Diversion Load
- Wind Rectifier/Controller Box
- Manual Brake Switch
- viewUGE™** Remote Monitoring System

SPECIFICATIONS

Inputs	Wind	Solar
Maximum input power	5000 W	5000 W
Maximum output power	5000W	
Communication Interface	RS485, BLUETOOTH	
Design lifetime	20 years	
ViewUGE Online Monitoring	Wind Energy Produced, Wind Speed (Anemometer) Solar Energy Produced, AC Energy Consumption.	
Braking System	Electrical braking. Automatic overspeed control through diversion load. Manual brake in double-throw switch.	
Certifications	UL, CE, VDE, AS/NZS	

THE POWER TO DREAM

330 W 38th Street, Suite 1103, New York, NY 10018
